

Screening and Identification of Depressed Patients

Patient is enrolled in DAWN Depression Treatment

Pre-treatment Education and Engagement Session with Depression Care Manager (DCM)

Initial Treatment Visit with DCM

DCM reviews patient with Consult Team (OB-GYN and Psychiatrist) weekly

Phase 1 Treatment (4 to 8 weeks) antidepressant medication  
OR  
Problem-Solving Treatment – Primary Care (PST-PC)

DCM phone contact week one to ensure prescription filled, follow up on progress &/or difficulties with PST-PC. Weekly contact

Assess Treatment Response (@4 to 8 weeks)

Insufficient Response/Relapse  
- consult with Treatment Team to modify treatment  
- adjust antidepressant and/or add PST-PC

Maintenance  
- relapse prevention plan  
- monthly telephone follow-up for 6 months

Complete Response
